						(38)		2	

4 I think that more farmers will grow fruits and vegetables without using chemicals. There are two reasons why I feel this way. First, fruits and vegetables that are grown without chemicals are healthier. More and more people are careful about their health these days, so they will be interested in buying such fruits and vegetables. Second, growing fruits and vegetables without using chemicals is better for the environment. For example, chemicals used in farming can harm the drinking water supply. It is for these two reasons that I think more farmers will grow fruits and vegetables without using chemicals.
