4	I do not agree that studying science is more important for students than studying art. First, art can help students become more creative. This will help them think about things in new ways. Second, some people are not interested in having a career related to science. Instead, many students want to have a career that involves art, such as graphic design. These students should be allowed to study something that will help them in their future. For these reasons, I do not agree that studying science is more important than studying art.
