| 4 | I think that this trend will continue in the future. First, by reducing the use of plastic, fast-food restaurants can attract more attention from people who want to do something to help the environment. Nowadays, many people are concerned that plastic items have a bad effect on the environment. Second, technology will make it possible to reduce the cost of producing non-plastic products. This will make it easier for fast-food restaurants to replace plastic products with non-plastic ones. Therefore, I think non-plastic products will become more common in fast-food restaurants. |
