4	Some people who enjoy music prefer to listen to music on CDs. This is because they can enjoy having a collection of their favorite CDs and listen to songs that online services do not provide. However, people need space to store CDs, and throwing CDs away has a negative impact on the environment.
5	I think this will become more common in the future. First, it is convenient for patients to make an appointment online. They do not need to call the hospital, and appointments can be made even when the hospital is not open. Second, hospital workers can do their jobs more efficiently. They do not have to spend their time talking on the phone to coordinate the schedules of many patients. This gives them more time for other tasks. Therefore, I think making an appointment with a doctor online will become more common in the future.
