5	I think tall buildings will increase in the future. Some of them will become symbols of the town. I have two questions about your club. First, when was the club established? Second, what days of the week does the club meet?
6	Yes, I think so. First, children can become healthier by starting sports at a young age. For example, running or jumping helps strengthen their bodies from an early age. Second, children can learn the importance of teamwork and communication. By playing sports, they learn to cooperate with others and share ideas early in life.
