		(29)	1

5	I think the number of Japanese people living abroad will increase in the future. They can have more job opportunities by living abroad. I would like to ask you two questions. How many pages does the newspaper usually have? Are there many photographs in the articles?
6	Yes, I think so. First, students can build confidence. By studying subjects they find difficult, they can get over their weak points and feel better about studying these subjects in the future. Second, they will develop the habit of trying hard. Through keeping studying hard to overcome problems, they will get used to making an effort when things are difficult.
