5	I think it is a good experience for children to watch an ice show by a professional ice skater. They can learn the importance of making an effort to become a professional. I have two questions. How many people came to the festival? Were there many tourists from other countries?
6	No, I don't think children should go fishing alone. First, it is boring. Fishing is more enjoyable when they can share the experience with friends and family. Second, children will miss opportunities to learn from adults. Fishing with adults helps children learn new skills and techniques and fully enjoy the activity.
