5	I think more shopping malls will have an area with a stage to hold events. Shopping malls can attract more people by holding events in such spaces. How much was the bookshelf? Is the bookshelf big enough to hold all of your books?
6	Yes, I think so. First, international news helps students understand the world. For example, they can learn about different cultures and events in other countries. Second, it also helps students understand their own country better. When students read about other countries, they can compare them with their own country and notice its good points and problems.
