	B	(26)	4
		(27)	4
		(28)	3
		(29)	2

5	I think people should often check information about how long they spend using their smartphones. If they see such information, they may stop using their smartphones too much and spend more time on their studies or hobbies. Which country is the drama from? Is it popular among high school students?
6	Yes, I think so. First, learning two or more foreign languages gives children more chances to communicate with people around the world. They can share their ideas and learn about other people's values. Second, learning several languages increases future opportunities for children. They may study or work in different foreign countries when they grow up.
