		(19)	3
		(20)	1
	B	(21)	1
		(22)	3
		(23)	2

3	A	(24)	1
		(25)	4
		(26)	2
	B	(27)	1
		(28)	2
		(29)	4
		(30)	1
		(31)	1

4	Some countries are introducing smartphone voting to allow people to vote online. This method is convenient for busy workers and helps young people participate more easily. However, there is a risk of hackers changing voting data, which may harm public trust in the results, and older individuals who are uncomfortable with smartphones might feel excluded.
5	I think this is a good idea. First, it can improve the quality of sleep for residents. Light from electronic signs that are too bright can enter people's bedrooms and disturb their rest, which may cause health problems. Second, it can contribute to energy savings in cities. By limiting the brightness of these signs, cities can reduce the total amount of electricity used at night. Therefore, I think it is a good idea for cities to make rules to limit the brightness of electronic signs at night.
