5	I think more people will use a service that delivers a variety of box lunches to their homes. It is very convenient for busy workers who do not have enough time to cook. What is the maximum temperature of that oven? Was it made in your country?
6	Yes, I think it is a good idea. First, streetlights help reduce the risk of crime at night. Bright lights make dark streets safer for people to walk home late at night. Second, people who drive cars can see roads better in the dark with streetlights. This will likely result in fewer car accidents on the streets at night.
