5	I think more towns will have a children's festival with games and activities held by local volunteers. It is good for the community to work together to raise the local children. How large is the new library? Is it open every day?
6	Yes, I think so. First, children can stay healthy by exercising in winter. They usually stay inside when it is cold, so these sports give them a chance to move around. Second, children can go to exciting new places. For example, they can enjoy skiing in beautiful mountains with a lot of snow.
