4	I do not think the number of such people will increase in the future. First, it is important for people to maintain their health. If they work both during the day and the night, they may not be able to have enough time to sleep. As a result, they may become unhealthy. Second, work-life balance is becoming important for many people. For example, if people work too much, they may not be able to have enough time to spend with their families. Therefore, I do not think the number of people who work two jobs will increase in the future.
